Designated Agent's Signature	Date
Print Name	

Any changes to the proposed earth change activities made to the project after submission of permit application must be presented to and approved by the soil erosion control officer before the changes have been started.

Obtaining a soil erosion control permit does not preclude the need for additional local, state or federal permits. It is the landowner's responsibility to ensure all permits are secured.

The project must be staked before the soil erosion officer can inspect the proposed earth change activities and issue the soil erosion control permit.

The soil erosion officer has 30 days to review the presented application, but typically the permit can be issued between 5 – 10 business days.

SOIL EROSION CONTROL PLAN

As required by law: R323.1703

A. Site Plan (detail on page 3)

B. Soils Information from Soil Survey or Actual Soil Boring:

C. Individual Responsible for Erosion Control During Construction:

Print Name: _____ Contact Number: _____

D. Detailed Written Soil Erosion Control Plan

- 1. The timing and sequence of each proposed earth change.
- 2. The location, timing, and description for installing and removing all proposed temporary and permanent soil erosion and sediment control measures.
- 3. Program proposal for the continued maintenance of all permanent soil erosion and sediment control measures that remain after project completion, including the designation of the person responsible for the maintenance.

A. Site Plan
Scaled Drawing

(Scale not more than 200' to the inch)

Must Include: (where applicable)

- Existing/proposed buildings
- Distance earth change is from surface water
- Dimensions of proposed earth change (s)
- Location of all erosion control measures
- On site drainage: existing and proposed
- Stockpile location
- Slope and contour information
- Driveway/well/septic location
- North arrow
- Distance to property lines

Differentiate earth change with cross hatch, dashed line, or bold lines –etc.
