
Appendix A

(Description of Work Scope Item)

Wildlife Vegetative Seedings (13 acre)

- Fertilize, seed & disc food plots (13 acres)

Scope of work consists of applying fertilizer (200 lbs. per acre: 0-26-26 or 0-14-42) and disking in; then seeding with a mixture of clovers and cover crop of oats lightly disked in and compacted (red clover – 5 lbs., ladino clover – 5 lbs., white clover – 2 lbs. and certified oats - 32 lbs.; per acre).

This scope item should be Bid on a lump-sum per acre (unit) price. Expected total acreage of 13 acres. Each area will be designated by the DCD on the final work order (appendix D).

Fertilizer application and seeding dates are between May 1st and June 15th, 2022.

Weather and access road dependent project (the DCD will dictate work dates per contract).

Size of Plots

- 4 - ½ acre
- 9 - 1 acre
- 1 - 2 acre

Project Location Map (Appendix D): this map provides the location for each food plot seeding. Each plot has already been chemically sprayed with herbicide.
